### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Bruce Stuckman on October 19, 2006.

The application has been amended as follows:

#### In the claims:

Claims 4, 24, 38, 53, and 70 have been cancelled.

Claim 36, line 15, term "on" has been changed to --from--.

Claim 36, last line, the terms "identified packet." have been changed to --identified packet, wherein the receiving module comprising decoding module to decode the identified packet, based on the data conveyance protocol, to recapture at least a portion of the one of the plurality of channel selection commands.--.

Claim 49, line 16, after "commands;", insert

--decode, based on a data conveyance protocol of the multimedia system, the data frame to recapture the at least a portion of the one of the plurality of channel selection commands;--

Claim 49, line 19, the terms "selection command" have been changed to --selection commands--.

Claim 49, line 20, the term "a data" has been changed to --the data--.

***Allowable Subject Matter***

2. Claims 1, 3, 6-23, 28, 30-36, 41-51, 54-69, and 72-79 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The closest prior art, William of the record teaches a system comprising a receiver to receive a broadband video/audio/data signal having a number of individual program multiplex signals therein; demodulate the received transmodulated signal and provide user-specified channels to processing or display units, send requests for user-selected channels to the transmodulator which uses these requests to select which of the portions of the broadband signal will be transmodulated; and Lambrecht et al. (US5,951,664 A) teaches transferring periodic data streams on a bus in a computer system. William and Lambrecht, either singularly or in combination, fail to anticipate or render the limitations "wherein the receiving the plurality of channel selection commands further includes monitoring a shared bus at specific time intervals, identifying a data frame at one of the specific time intervals that contains at least a portion of one of the plurality of channel selection commands, and decoding, based on a data conveyance protocol of the multimedia system, the data frame to recapture the at least a portion of the one of the plurality of channel selection command" as recited in claim 1 and similarly recited in claims 21, 36, 49, and 67.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
